6. Please explain your rating above regarding academic integrity of AI use for this submission. Why? (Write in 2-3 sentences) \*

I believe that in regard to my academic integrity that it's fair to use AI content generators. This is because it can be good for ideation (generating names, getting ideas for what to do) or it could be good for if you already have ideas and need to formalize them. However, I believe that it's not okay to directly copy-paste from an AI content generator, such as directly copying its idea without building off it.

10. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences) \*

For this submission, AI greatly helped me generate different ideas for tech stacks and what each component of the stack could contribute to the project. For example, AI helped me learn about Next.js, and how it could help with easier API integration instead of going with React. In addition, AI helped me learn how to come up with an ideal user of our site, and gave me examples to give me an idea on how to make this user.

11. List the name all the AI tools that you used for this submission \*

DeepSeek AI.

12. How confident were you in AI's responses that you received? \*

- ☒ Confident
- ☐ Somewhat confident

- ☐ Neutral
- ☐ Somewhat not confident
- ☐ Not confident

13. How did you ensure the answer you received from the AI tool was correct? \*

I double-checked on the Next.js documentation for different features on it and the documentation of the other components. In addition, I also did more research into how to develop a user story to confirm the AI's information.

14. Did you at any point abandon using AI tools and seek other resources? Explain your answer.  
(optional)

16. Please explain your ratings above, especially if you have AI tools for "other" types of work. \*

Did not use any AI for proofreading, text completion, text analysis, summary, or sketching. However, I did use AI to do research into different potential tech stacks we could use, and ideate on how to generate an ideal user for the user story (but I came up with the user on my own).
